

# The BSI Preventive Medicine Body Scan Program

**No Cost** to eligible IBEW Local 18-Sponsored  
Anthem Blue Cross Medical Plan Subscribers  
and Spouses/Domestic Partners on their plan  
(a \$1995 Value)

**Body Scan International** is proud to enter into their 19th year of providing service to the IBEW Local 18-sponsored health plans. Since 2004, more than 7,000 Local 18 members and spouses/domestic partners have participated in the BSI Preventive Medicine Body Scan program, with a member satisfaction rating of over 99%.

## The BSI Advantage:

- The BSI Body Scan program consists of two main components: a detailed high resolution CT scan of the torso, and a physician consultation
- The scan utilizes specialized software to aid in the evaluation of Coronary Artery Disease, lung disease (including lung cancer), over 20 additional types of cancer, anatomic changes indicative of prediabetes/diabetes, spinal issues, bone mineral density issues (including osteoporosis), and many additional health concerns
- Your appointment includes a comprehensive consultation/scan review with a specially trained board-certified BSI radiologist (physician.) This consultation can take place virtually anywhere with the HIPAA compliant BSI WebEx teleconferencing portal
- Scan appointments are available onsite at the Local 18 Headquarters, or at multiple other locations from Bishop to San Diego
- The initial study provides you with an anatomic baseline and comprehensive educational experience to help you truly understand the current status of your health
- Follow-up examinations include a detailed comparison to your previous examinations, which allows for detailed health tracking and lifestyle assessment
- BSI is the most experienced Body Scan company in the world (over 160,000 examinations performed since 1997)
